

# IN-SHELL SIZER

Model Number: ME-ISS

## PRODUCT DESCRIPTION

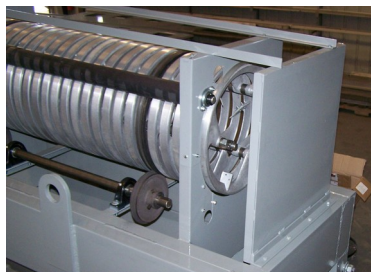

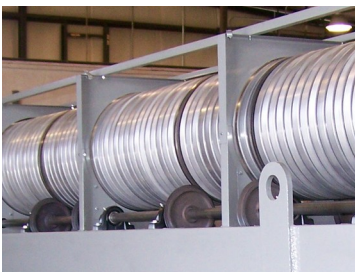

Our In-Shell sizer design is a highly customizable machine that helps to productively size all types of nuts. The sizer separates the nuts by the diameter of the nut through a series of aluminum rings spaced out specifically to fit the requested nut size. The configuration to these rigid aluminum rings makes this sizer the most accurate in the industry. We offer sizes from #8 to size #16 pecans with an optional trash removal stage. The length of each sizing section is strictly up to you and your shelling needs.

## SPECIFICATIONS

Both pound per hour and estimated crated weight are fully dependent on the specifications of your order  
Dimensions : 75 in. Height x 36 in. Width x Length (Depends on order specifications)

## FEATURES

- Pounds per hour depends on number of rings in each sizing section
- Rigid rings eliminate mixing of sizes
- Most accurate in-shell sizer on the market
- Time proven design
- Highly customizable
